

COHA (Chimie Organique et Hétérochimie Appliquées), UMR7042-LIMA, Strasbourg

***Keywords : Heterochemistry, Synthetic methods and catalysis, Stereocontrol,
Sustainable methods, Applications***

Principal Investigators :

- Frédéric Leroux
- Sabine Choppin
- Morgan Donnard
- Gilles Hanquet
- Armen Panossian

Dr Frédéric
LEROUX (DR)

Dr Gilles
HANQUET (DR)

Dr Sabine
CHOPPIN (MdC)

Dr Morgan
DONNARD (DR)

Dr Armen
PANOSSIAN (DR)
Team Leader

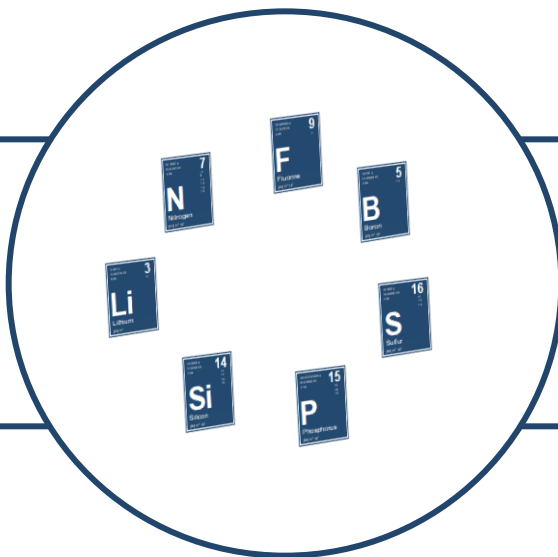

Heteroatom Chemistry

Sustainable Methods

Stereoselectivity

Bioactive Targets

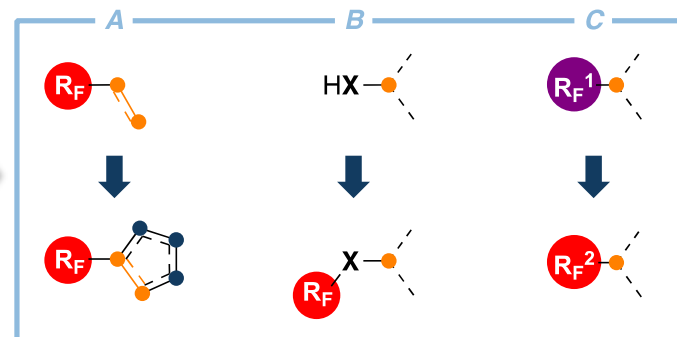

COHA – Focus on organofluorine chemistry – Recent examples

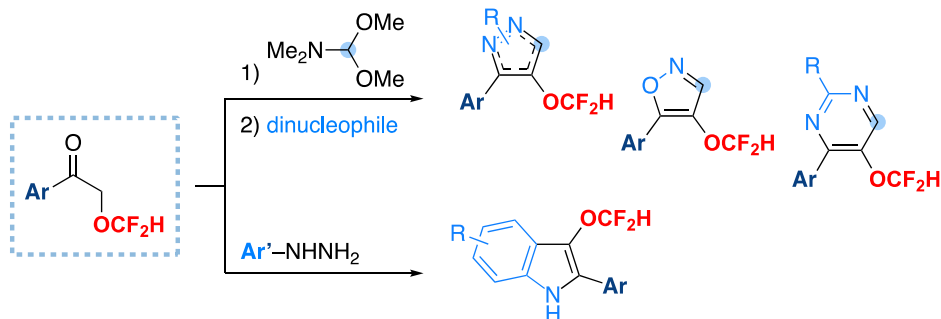

F, CF₃
others

Need for

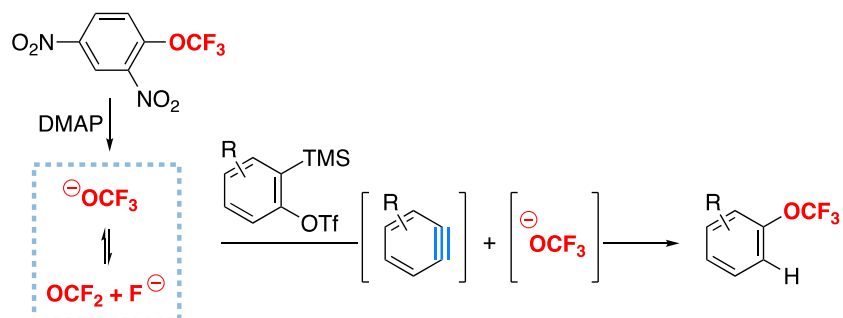

- New properties/MOA
- New structures
- New methods

A – Construction

B – Grafting

C – Transformation
